

# Freiheit, Love Is No Science

It doesn't help to be conclusive  
It's will-o'-the-wisp and so elusive  
What can you say  
What can you do  
When no one knows which way it's going

I try to understand my feelings  
And cover them up, they're so revealing  
What can you say  
What can you do  
When feelings overflow

Love is no science  
It's in an unexpected kiss  
Love is a natural force  
So let it take its course  
You'll feel it everywhere  
Love is no science  
And it can never be controlled  
It doesn't follow rules  
It isn't taught at schools  
And still it's always there

So we don't have to talk about it  
Cause talk is so cheap and time is wasting  
What could we say  
What could we do  
To change the role that love is taking

We're prisoners of fate and passion  
Controlling it all is out of fashion  
What can we say  
What can we do  
When feelings overflow

Love is no science  
It's in an unexpected kiss  
Love is a natural force  
So let it take its course  
You'll feel it everywhere  
Love is no science (no science)  
And it can never be controlled (no science)  
It doesn't follow rules  
It isn't taught at schools  
And still it's always there

Love is no science at all

Love is no science (no science, no science)  
Love is a natural force  
So let it take its course  
You'll feel it everywhere  
Love is no science (no science, no science)  
It doesn't follow rules  
It isn't taught at schools  
And still it's always there

Love is no science at all

Love is no science (no science)  
It's in an unexpected kiss (no science)  
Love is a natural force  
So let it take its course  
You'll feel it everywhere

(Love is no science at all  
Love is no science at all  
Love is no science at all)
