

Frenzal Rhomb, I Hate My Brain

Some people say that your brain is a product
if I bought it today I would take it back tomorrow
So many defects and faults sometimes I wish I didn't
need one at all because

I hate my brain.

When ignorance gets a hold of your neurons then it's not hard
to be tempted by its bliss its easy to get annoyed
when you focus on one thing until it almost disappears.

I hate my brain.

Some people say that your brain is your master not your
mind or your soul, it is what you have to follow,
I guess I'll try to find some common ground so we
can get along. I said: I hate my brain.
