

# Frozen Crown, Neverending

Our night, a trace that lasts forever  
Don't tell me lies, our voices burn together  
In this ghostly white

Leave out no legacy, no time to say goodbye  
When dreams meet reality  
And I know this tale is everlong  
But we will fail no more  
We'll be back to the place where we belong

Unending nights, neverending lights  
I know I could live for centuries  
But they'll be the brightest I'll ever see  
Stand by my side in the darkest times  
As this tragedy seems to be  
Always enclosed in our memories

Our night, it seems it's never over  
Time after time it seems we're getting closer  
To the fires in the sky  
Darkness is what I breathe  
Nightfall will return  
Shadows will never leave  
But I know the future comes along  
And we will fail no more  
We're staring at the abyss since we're born

Unending nights, neverending lights  
I know I could live for centuries  
But they'll be the brightest I'll ever see  
Stand by my side in the darkest times  
As this tragedy seems to be  
Always enclosed in our memories

Unending nights, neverending lights  
I know I could live for centuries  
But they'll be the brightest I'll ever see  
Stand by my side in the darkest times  
As this tragedy seems to be  
Always enclosed in our memories
