

Fuel, Falls On Me Real

I've seen you hanging 'round
This darkness where I'm bound
And this black hole I've dug for me
And silently within
With hands touching skin
The shock breaks my disease
And I can breathe

And all of your weight
And all you dream
Falls on me, it falls on me
And your beautiful sky
And the light you bring
Falls on me, it falls on me

Your faith like the pain
Draws me in again
She washes all my wounds for me
The darkness in my veins
I never could explain
And I wonder if you ever see
Will you still believe

And all of your weight
And all you dream
Falls on me, it falls on me
And your beautiful sky
And the light you bring
Falls on me, it falls on me

Am I that strong
To carry on
I might save my life
I might save our world
Would you save me?

And all of your weight
And all you dream
Falls on me, it falls on me
And your beautiful sky
And the light you bring
Falls on me, it falls on me
