

Further Seems Forever, Aurora Borealis

Oh my God I've been waiting for you
All of my life
The trees are tired from breathing
Sharks keep moving - never stopping
Sharks keep moving on
Cut out my eyes to spite
My heart wish for sleep but never stopping
Assignments pile up

Watch out baby - going way too fast
Without eyes in the back of your
Never know where you came from
Please let me crash now break my body
Split myself in two
Split myself into you
