Gabrielle, Forget About The World

You had to take the time

Cos you had to make up your mind

You really didn't want to choose

But you had too much to lose

Time was passing by

Didn't have it on your side

Knew what you had to do

To win sometimes you gotta lose

They tried to change your mind

Told you how to live your life

And they told stories

Stories that shouldn't be told

It was you against the world

But you chose to hold on to your girl

You gotta believe that she's the one worth fighting for

Forget about the world

And worry about the girl

Not what they say

Not what they say your future holds for you

Forget about the world

And worry about the girl

Not what they say

Not what they say the future holds for you

Had problems in the past

There's no use in looking back

The future holds so much for you

Go to the light and pass on through

You had a stronger love

Outside forces weren't enough

Tried their best to tear apart

A love they hoped would never last

So they tried to change your mind

Told you how to live your life

And they told stories

Stories that shouldn't be told

It was you against the world

So you chose to hold on to your girl

But you gotta believe that she's the one worth fighting for

Forget about the world

And worry about the girl

Not what they say

Not what they say your future holds for you

Forget about the world

And worry about the girl

Not what they say

Not what they say your future holds for you

You gotta hold on to what you want

What you've been fighting for

You gotta believe in it - hold on

Until you can fight no more

You gotta hold on

And you will see

See your destiny

Then you will know

Which way to go

Forget about the world

And worry about the girl

Not what they say

Not what they say the future holds for you

Forget about the world

And worry about the girl

Not what they say

Not what they say your future holds for you
