

# Gareth Emery, Lost (feat. Janet Devlin)

And there's no smoke without a reason  
It's a sign there's something wrong  
In my lungs there's a poison  
I've been breathing in too long  
Coz there's no I  
No I in 'we'  
And there's no you  
No you in 'me'  
Coz I've been burned  
Way beyond the third degree

Coz your words are like gasoline  
You pour on the fire  
And the bridges you burnt  
Led to our dreams  
It's just another thing that we lost  
When the spark turned into flame  
And the spark turned into flame  
And the flame grew much higher  
And my hope, faith and every last desire  
Is just another thing that we've lost in fire  
Just another thing that we've lost in fire /3x

Ashes fall just like snowflakes  
That are warm against my skin  
You say that we could rebuild this  
Wouldn't know where to begin  
Coz there's no snow and there's tears  
To douse these flames  
Coz I've been burned  
Way beyond the third degree
