

Gary Barlow, Arms Around You

Out of the water, feeling down, feeling cold
Into the fire, to a world I'd never known
God I'm so tired, been a long long road to here
But God it's been worth it, when I feel your body near

Chorus

With your arms around me, love surrounds me ever by my side
With your arms you hold me, trust and show me all I feel tonight
All this time that I've been searching
All this time that I've been hurting
It heals, when I'm in your arms each night
Running away from, all the love I never knew oh no

Only to fall, into the arms of someone true, yeah
How I never noticed, I've been searching for so long
Waiting to find someone to make me feel this strong

Chorus

With your arms around me, love surrounds me ever by my side
With your arms you hold me, trust and show me all I feel tonight
All this time that I've been searching
All this time that I've been hurting
It heals, when I'm in your arms each night
