

# Gary Jules, One Little Light

No friends, no neighbors  
No amateur soul savers  
Just a little light in the sky  
No meteor, no moon  
No cotton, no spoon  
Just a little light in the sky

Jupiter, catch me dancing  
You could sing a song for me  
Tell the vampires  
To let me sleep, I'm tired  
Jupiter, I'd begin  
But the world is still in spin  
And I don't even know  
What day it is today

Oh I was chasing the one light like everyone  
And I am a rock in a landslide like everyone  
Everyone is moving so fast

No fuss, no fight  
No wrong and no right  
Just a little light in the sky  
Went the distance on my feet  
Now I'm squirming in my seat to see  
That little light in the sky

Jupiter, catch me dancing  
You could sing a song for me  
Tell the vampires  
To let me sleep, I'm tired  
Jupiter, I'd begin  
But this story's wearing thin  
And I don't even know what day it is today

Is today the day?

Oh I was chasing the one light like everyone  
And I am a rock in a landslide like everyone  
I was losing the good fight like everyone  
And I was chasing the one light like everyone

Everyone is moving so fast  
Everyone is talking so fast  
Everything is changing so fast
