

Gary Jules, Pills

I've taken all my pills

but I'm still not sleepy

tried to trick myself into thinking

that I'm not awake

that it's only a dream

put that cigarette out

don't ask me no questions

salome dancing on my wall

and the shadows on the floor

look so warm from here

I've seen it all before

just one little lie

but the difference is this

it meant the world to me

don't ask me no questions

"take the wheel" she said "as I wander"

we could leave this town

I've got all I need: spirit, hope and joe

but no one knows me

I think I lost my pills

guess I'll take my chances

I'm looking at the telephone

but nothing happens

I am well aware

that the morning is near

put that radio down

don't ask me no questions
