

# Gene Clark, I Found You

Well I knew at the moment when I saw you  
I could feel you close to me across the room  
Last night, oh all right  
I found you  
What went down there I knew could never leave me  
It was that feeling, girl, I got from you  
Last night, oh all right  
I found you

It's been much too easy to remember sometimes  
How empty handed loneliness can be  
But when you were there to ease my mind  
There was so much of something that I need  
All the changes in the places at the time when  
You were there and then at once I was with you  
Last night, oh all right  
I found you

Last night, I said, all right  
I found you
