

Gene, New Amusements

You are here to serve me
Shut up
Sit down
Begin, observe me
I see things where I'm alone

So choose your favorite weapon
From the list I have assembled
Do it fast
Then take me slow

A whole lifetime led
With every minute spent
Trying to feel things
No one has ever felt

I can bring bring you solace
On the bureau in my office
I dream of you alone

So choose your favorite weapon
From the list i have assembled
Do me fast
Then take it slow
