

George Jones, You And Me Together

Well we found a life together and it's a gonna last forever

Nothing can hurt me now cause you are mine

We put away all of our sadness we're walking every day with gladness

You and me together all the time

Well she wants to love me a little bit better it's okay I'm gonna let her

When he holds me I can feel he's hard giving love's true and real

Oh now we got a little bitty baby we're happy and we don't mean maybe

You and me together all the time

[steel]

Well we'll build a little house in the country and we'll go to church every Sunday

We got each other and we don't need a thing

We start every day with a sweet kiss and that's one thing we wouldn't miss

You and me together making life sweet

Well she wants to love me...

You and me together all the time
