

Giant, Get Used To It

I've been looking for an answer in the sky
Can you hear me? 'Cos I need a reason why
I think I'm in trouble, with my heart out on my sleeve
So I'm calling, 'cos I need her as I live and breathe
Don't let the sun go down, 'cos tomorrow she'll be gone

Chorus:

Give me one more day and I'll make her stay, hold back the night
If you're really there and you hear my prayer, hold back the night
Hold back the night, oh the night

Every minute, it gets closer to goodbye

Can't you give me just a few more hours to change her mind

Don't let tomorrow in, 'cos I just can't face it alone

chorus

I watch the light fading to black

I'm counting on you to build me a bridge, so I can bring her back

(Instrumental break)

Don't let the sun go down, 'cos tomorrow she will be gone

chorus

(One more day, make her stay) hold back the night

If you're really there and you hear my prayer, hold back the night
