

# Gilbert B, A Little Love And Understanding

You're on your own  
And what you need's  
A little love and understanding, hee-hee-hee  
A little warmth to tell your soul  
A gentle bird that softly sings, hee-hee-hee-hee

Each night my voice happens to sneak  
Through your transistor radio, ho-ho-ho  
I'm just a secret you can keep  
And no one ever needs to know

You're in that city far away  
I'm on the ship way out at sea  
You got some problems you can't face  
So leave them behind, any place

For out of sight is out of mind  
And in time, and in time, and in time, and in time, and in time  
You'll find peace of mind  
Ho-ho-kay-ay (okay), good, good

You're room is like a desert isle  
You often filled with silent tears, hmm-hmm-hmm  
So grab your coat, put on a smile  
Go out and buy yourself some cheer, hee-hee-hee-hee  
Why sit there thinking of the past  
Recounting empty days gone by, hah-hah-hah  
When you should make each moment last  
It isn't hard to do, just try

Drink to the city far away  
To all the sailors 'way at sea  
All those problems you can't face  
So leave them behind, any place

For out of sight is out of mind  
And in time, and in time, and in time, and in time, and in time  
You'll find peace of mind  
O-kay, hm-hm, (okay), good
