

Giovanca, LoveChild

From a to b
You fly high in the sky and I
I would run a thousand miles
Trying to catch you
From a to z
You can sigh and deny all you like
But you know you're trying to hide
Now what if I let you?

Love child I only feel for you
Why are we running around in circle? /2x

From time to time
Hesitation reflects in your eyes
What if someone knows your heart?
Knows how to love you?
Can't ease your mind
I won't love you and leave you behind
Lay your head down, it's alright
There's no one above you

Love child I only feel for you
Why are we running around in circle? /2x

Running around in circle
Running around in circle now
Running around in circle
