Girlysound, Beg Me

Take one more step and it's over
Back up slowly in sight
Breathe too loud and I'll kill you
Get down on your knees and beg me beg
Beg me beg me beg

Take off all of your clothes
Lie face down on the bed
Move one inch and I'll shoot you
Make like a woman and beg me beg
I said beg me beg me beg

Every night on TV I see things that should make me blush Looks like it's gonna be Another open season open season on us Open season open season on us

It's the first hot day of the summer Looks like there's gonna be thunder I've been sitting here all afternoon Watching the clouds

I can see the sky from my window I can feel the wind and smell the rain And I don't see what difference it makes If I'm a man or a woman
