Glen Campbell, Country Girl

About five o'clock in the late afternoon sun's gettin' drowsy above me Tonight I walk neath the sparkling moon with the girl who is happy to love me She's my sweet country girl and she's all that I need The whole world wears the smile when she's talking Sweet country girl it's not hard to believe Pretty flowers bloom wherever she's been walking uh-huh

Shadows erase in the last light of day night time is startin' to settle Red colored stone Lord is leading my way to her cottage way down in the meadow She's my sweet country girl...

Green trees and golden hay and sunshine here every day Big cities far behind me well it's love with her to think I'm a gonna stay About five o'clock in the late afternoon... She's my sweet country girl yes she is She's my sweet country girl and I love her she's my sweet country girl
