

# Glenn Tipton, Resolution

We didn't start it  
Or firearm it  
Better call in the U.N. to disarm it  
Ceasefire  
Tell the snipers  
Cause you're dealing with a bunch of fucking liars  
Streetfighter  
Outsider  
But they're never going to take it from us  
We believe it  
'cause you dream it  
One day you'll realise we mean it

Oh! in the night, when the wind and rain  
Puts out the flame  
The morning sun warms up the blood  
And the candle burns again

My resolution is getting strong  
I feel so good now I know where I am going  
My resolution gives me the power  
To get back on my feet when they knock me to the ground

Unify it, don't try it  
Just another sell and we won't buy it  
Peace treaties are in pieces  
You can see it everyday on the tv  
They fly around and say they're making ground  
But put your money on another breakdown  
The real war is right here with us  
And it's going to go on and on and on

Oh! in the night when the wind and rain  
Puts out the flame  
The morning sun warms up the blood  
And the candle burns again

My resolution  
Is getting strong  
I suddenly believe in what I'm doing  
My resolution won't go away  
I feel it growing stonger everyday

On our way  
To change the course of history & time  
We shall try  
To reach inside and find a strength of mind  
Who wants war?

Oh! in the night when the wind and rain  
Puts out the flame  
The morning sun warms up the blood  
And the candle burns again

My resolution is getting strong  
I suddenly believe in what I'm doing  
My resolution gives me the power  
To get back on my feet when they kick me to the ground  
My resolution won't go away  
I feel it growing stronger day by day  
My resolution will never die  
My contribution could be my life
