

Gluecifer, Freeride

Time to get up - another day,
turn the clock - and look away
Sit around - doing none
Sit around 'till the day is done

You're hanging out at the turn
Stuck again You should burn
You're hanging out wastin time, hang around say you wait for the line

You have a freeride coming better pick up the call you have a freeride
You have a freeride coming so you better get on you have a freeride

It is good when it is numb
Waiting for tomoorow never comes
And if it does who cares
The days are all the same around here

Sleep'am away betwenn dirty sheets
It takes a miracle to get on your feet
Things move just a little too fast
you take a ride take a ride in the past

You had a freeride coming but you never got on you had a freeride
You had a freeride coming but you missed the call you had a freeride

Oh my my now it feels so cold, had it coming but you missed the call

You had a freeride coming but you never got on you had a freeride
You had a freeride coming but you missed the call you had a freeride
