

Gnarls Barkley, Going On

I've seen it with my own eyes
How we're gettin' otherwise
Without the luxury of leavin' (leavin')

The touch and feeling of free
Is intangible technically
Something you've got to believe in

Connect the cause and effect
One foot in front of the next
This is the start of a journey (journey)

And my mind is already gone
And that there're other unknowns
Somehow just doesn't concern me

And you can stand right there if you want
But I'm going on

And I'm prepared to go it alone
And I'm going on
To a place in the sun that's nice and warm
And I'm going on

And I'm sure they'll have a place for you too

Anyone that needs what they want
And doesn't want what they need
I want nothing to do with

And to do what I want
And to do what I please
Is first off my to-do list

But every once in a while
I think about her smile
One of the few things I do miss

But baby I've got to go
Baby I've got to know
Baby I've got to prove it

And I'll see you when you get there
But I'm going on

And I'm prepared to go it alone
And I'm going on
May my love lift you up to the place you belong
And I'm going on

And I promise I'll be waiting for you
