

# Go Fish, I See You

Chorus:

Now I see You, I see you everytime I open my eyes  
I see You, I dont need to look too far  
I see You, I see you in the way that Youve changed my life  
Ever since You turned around my heart, I see You

vs. 1

I thought I could find You here  
Im trying to be sincere  
You show me again and again  
That I need You more than  
The stars need the sky, day needs the night  
You open my eyes, You open my eyes

vs. 2

Its funny how You always show  
When I give up and let it go  
I know You know what I need  
And I need You to help me see  
The truth and the lies 'cuz I can be blind  
But You open my eyes, You open my eyes

In the hope and the joy and the pain  
In the sun and the snow and the wind and the rain  
In the words that You wrote for me to read  
In the way that you meet my every need
