

# Goapele, Change It All

Verse 1:

They're closing all the schools down  
Some teachers work for free now  
And libraries won't be found  
Cause there's not enough

Can you see a change in your town  
Small close it's ???  
I'm trying to sort it out  
What we're giving up

Chorus:

Basically  
There are people left out  
From living  
Comfortably can we figure it out  
I've been waiting  
Restlessly for the words to a song  
That would  
Change it all  
Change it all  
Change it all

Verse 2:

I never found a 9 to 5  
That was worth it from my soul  
Til I  
I pursued what brought joy in my life  
And there's something for us all

And I still think it is my right  
And it's the last and one of few  
To get the luxury for learning  
Something I could use

Chorus:

Basically  
There are people left out  
From living  
Comfortably can we figure it out  
I've been waiting  
Restlessly for the words to a song  
That could  
Change it all  
Change it all  
(If the words could change it all) Change it all  
(Change it all)

Bridge:

So many laws are changing  
They say it's the price for war  
We send over at least ? billions  
It's hard to believe that years ago people died to fight  
But history feels so far away  
History feels so far away  
We're not fighting for our lives anymore  
You're not fighting for my life anymore  
It's hard to know what's really worth fighting for  
Or is it killing and dying on the streets

Chorus:

Ohhh  
Basically  
There are people left out

From living  
Comfortably can we figure it out  
I've been waiting  
Restlessly for the words to a song  
That could  
Change it all

Chorus 2:  
Oh!  
Basically  
There's enough for us all  
So  
Why can't we somehow figure it out  
I've been waiting  
Restlessly for the words to a song  
That could  
Change it all  
Change it all  
(If the words could change it all) Change it all  
Change it all  
Change it all  
If a song could change it all  
What if we could change it all
