

# God Lives Underwater, Dress Rehearsal For Rep

It's cold outside  
But not cold enough  
I wish that it was winter  
And behind my eyes  
The muscles control the movement  
To a place surrounding you

CHORUS (X3)

To be with you  
To be in motion  
It's wide outside  
But not wide enough  
I wish that I was thinner  
Suffice to say I should pray  
For a colder sun  
And a brighter moon  
All for you

And be in motion

CHORUS (X3)

Happy?  
Everyday's the same  
Since I've been alone  
Everyday I wait for you  
But you're never coming home

CHORUS

And I hope that you're happy  
At least one of us...

Is

Maybe someday you'll see  
I need you  
To save me from myself  
Everyday I swear that I see you  
Everywhere I go  
I know my mind plays tricks on me  
And that's something that you know  
CHORUS (X2)
