

God Module, Companion

Recorded movements
Consciousness I can't recognize you
Insignificant seduction
Underlying the violent sky
Simulate natural emotion
Artificial intelligence
Consciousness I can't recognize
Even though I created you

Suspicious movement
Consciousness I can't recognize you
Imitate acts of devotion
Intertwined with your lies
Animate beyond life
Programmed monogamy
Consciousness I can't recognize
Even though I created you

Rewire your circuitry
To keep you safe at home with me
Program your eyes to cry
So you're content here by my side
