

God Module, Ever After

How can you not believe - In your hold over me?
Look into my eyes - You are my everything
As close as I'll get to heaven - Existing here on earth
You control my reactions and justify my birth

Frozen tears are hard to cry
But they will still melt over time
And so do our fears
Happily everafter

Let's pretend were not alive
Make believe we already died
So we can stay like this
And live happily everafter

Love has lost its mind - Forever we are entwined
Without you I can't breathe - Without you I'm not me
As close to the touch of an angel - That I will ever feel
Sometimes it's hard to believe that you are real
