

God Module, Let's Go Dark

It's true some things have changed
What we've opened cannot be closed
In the strangest ways
The lies that we tell
Are the truths we've been told

No time to decide
If what you feel is real
Or just a trick of the mind
We ascend together
& turn back the time to never

[chorus]
Let's go dark to see what we find
Turn out the lights
& start to lose our minds
When you can't see it's just a matter of time
Until they find you
Let's go dark & rewind the night
To see what moves when we close our eyes
Your heart beats in time with their cries
& stops when they find you
[chorus]

From beyond the grave
They scream out the answers that we'll never know
After life after death
we'll all go blind
From the things
That we're shown
