

# God Module, Winter Torture

Come together to tear down the sky  
Deny revelations see with my eyes  
Alone together we breathe as one  
We suffocate under the frozen sun

We work together to eliminate time  
Destroying ourselves ignoring the signs  
We've gone too far there is no turning around  
So dig your grave beneath the frozen ground

The cracks start to show  
I don't know if the ice will hold  
The winter of torture never ends  
Summer dies and it starts again  
The shapes in the snow  
Are made by souls with nowhere to go  
This winter of torture never ends  
We all die then it just starts again

We pray together to make the world end  
To bathe in the blood of our families and friends  
Unknown conclusions the loss of control  
You can't go to hell if you don't have a soul

Gather together to poison the air  
We take our last breath and still we don't care  
No motor functions; your vision is blurred  
Lying in a pile of dead boys and girls
