

# Gods Tower, Till Death Do Us Apart

In the depths of memory  
I watch the picture of my born  
The dancing shapes in the flames  
The Knife will grow to a sword  
The Gloomy Sage gave a sword to me  
He said it's time to start  
The fate of sword is to defend me  
Till death do us apart  
I remember life was going on  
I was growing strong  
Now the days of my youth has past  
The Knife became a sword  
When I was only seventeen  
My sword tasted the blood...  
My sword is salvation  
Life is in my hands  
Flesh and steel's connection  
In fight I'll be saved  
I am blessed to be right  
In my reality  
My God is Semargl  
Sword will defend me  
Enemies to be dead  
Just like in my dreams  
I will get the power  
Of immortality  
Fortunes of war  
Soon they will be mine  
I'll become a King  
Before I die  
My sword is my symbol  
My sword is my fate  
Everything I do  
I do for my gain  
My swrd is my symbol  
It's sign in my heart  
I'll never be conquered  
Till death do us apart  
In the depths of memory  
I watch the picture of my life  
All my friends are dead  
Good Bye my brothers in arms  
Now I stay in battlefield  
Now I'm fighting alone  
All my enemies are around me  
Prepare to cut my throat  
The grip of steel is squeezing slow  
Death by traitor looms  
I begin to lose my force  
To realize I'm doomed  
The cold blade in back is what I feared  
And I feel it now  
The fate of sword is to defend me  
But now death do us apart  
Me to ashes Sword to dust  
Me to ashes  
Sword to dust.
