

# Godsmack, Faceless

Hate me with everything  
I'm better off without your animosity  
I'll even sleep better at night...at night  
I once believed in you  
Reminded me of everything you put me through  
Now everything else feels alright...alright

I feel so betrayed...mistaken  
I create another day  
You'll be gone tomorrow  
Lie to me..you're faceless

You've made me out to be  
Responsible for your self-inflicted misery  
And never felt like this before...before  
Don't be surprised to see  
That I have nothing left for you to bleed  
When you come crawling back for more...for more

I feel so betrayed...mistaken  
I create another day  
You'll be gone tomorrow  
Lie to me...you're faceless

I create another day  
You'll be gone tomorrow  
Lie to me...you're faceless [x3]
