

Goin' Places, I Like Your Girlfriend

We saw each other that one night suddenly everything in the world was right
There was only one thing left to do figure out how to get rid of you
You think we're just friends well you'd better think again
cause I've got some news for you the rumors you've heard are true

I like your girlfriend
and she likes me too

She's always lookin' so sweet she keeps me on my feet
There's nothing I'd rather do then steal her away from you
I wish that she'd break up with you so I could stop feeling so damn blue
Times running out, you're outta luck next time watch out for my eighteen wheel truck
