Golden Earring, Space Ship

From the Album:

* Face it

I remember it happened Late one night No moon - no stars No sound - no light I was young and scared And afraid of the dark When I saw that space ship Shaped like a heart The years went by Just like a shot I was way too busy Growing up - I was datin' girls So I forgot -All about that space ship Shaped like a heart Well I woke up one morning Feelin' fed up and lost Runnin' out of luck Desperate for love And there she was I kid you not -That space ship shaped like a heart Blindin' my eyes Cloudin' my sight Givin' me hope it would be all right Space ship shaped like a heart I saw it in your eyes And in the way you smile Right from the start Space ship shaped like a heart Don't wanna ask me why Don't wanna say goodbye To that heart in the sky I was standin' by the window We just made love I was comin' down >From the push and shove And lookin' up -I saw a spark It was a space ship Shaped like a heart
