

# Goldfinger, Decision

This time you should know  
Like the first time that I saw you there alone  
Like the first time that I knew you were my own

The way you make me feel  
Like I was something that you couldn't live without  
Like I was someone that you couldn't be without

Something came in between us  
Something made a change in you  
What can I do?

So you made your decision  
I guess it's you that I'll be missin  
I lie alone in bed just wishin  
That I had been the one  
That I had been the one

This time you should know  
The way you made me feel so helpless and alone  
Erase the memories of all we've ever known

Something came in between us  
Something made us break in two  
What can I do?

So you made your decision  
I guess it's you that I'll be missin  
I lie alone in bed just wishin  
That I had been the one  
That I had been the one

Now I think I'm goin crazy  
Now you're stuck inside my head  
I don't ever wanna feel this way again

When you look in the mirror  
Does it all seem clear to you?  
Have I been used?

So you've made your decision  
It won't be me that you'll be missin  
I lie alone in bed just wishin  
That I had been the one  
That I had been the one

So you made your decision  
I guess it's you that I'll be missin  
I lie alone in bed just wishin  
That I had been the one  
That I had been the one
