

Goldie Hill, Love Love Love

Sometimes I cry when you don't call
I'm beginning to say you don't love me at all
But you're still my baby I want the whole world to know
I just love you baby I love you so

Friends all try to tell me that I'm just a fool
Your love don't mean a thing
But I keep hopin' someday you'll see things in my way
We'll make the wedding bells ring
Then I'll have you you'll keep me gay we'll be alone both night and day
So tell everybody I want the whole world to know
I just love you baby I love you so
[piano - guitar]
Friends all try to tell me...
