

Goo Goo Dolls, Save Me From Myself

Feeling like the world has turned to stone
Standing in a crowd but I'm on my own
Wake up on the floor with a dizzy head again
Trying to find a soul in these empty faces
Gotta get away from these worn out places
Pickin' up the pieces of myself again

Pretty face to hide your pain
Left your home to start again
Finding nothing everywhere you turn
Memories will chase you down
Catch you in another town
How's it feel to feel the same?
The same as me when I can't deal
Help me 'cause it's all too real

You can be the match that lights this spark
Shine a little light on a broken heart
Quiet all the noise ringing in my head
Save me from my
You could be the love that ends this war
You're the only thing that I'm dying for
Hold me down until the madness ends
Save me from myself

Holding on to promises
Like water through my hands
None of them were ever meant for me
The past is spinning in my mind
So keep me in the room tonight
And help me
Help myself this time

You can be the match that lights this spark
Shine a little light on a broken heart
Quiet all the noise ringing in my head
Save me from my
You could be the love that ends this war
You're the only thing that I'm dying for
Hold me down until the madness ends
Save me from myself

Save me
Save me
Save me
Save me from myself

You can be the match that lights this spark
Shine a little light on a broken heart
Look into my eyes till I feel again
Save me from my
Come and stay with me 'cause I need more
You're the only thing that I'm dying for
Hold me down until the madness ends
Save me from myself
