

Goo Goo Dolls, Superstar

I burnt these wings before
I never found a cure for this disease
So I stayed on the ground with all my fears
To keep me company

Time will change us all
The weight of gravity will find you
But I see you there and I believe
There's something left for me

I think the world spins 'round you
You make me feel so weightless, oh
Teach me to fly so high like you
'Cause love is all around
Love is all around 'cause you're a superstar

A million miles away
The light begins to drift across your face
And you were the answer to some prayer
That I forgot to say

The bombs above our heads
Are falling fast again, oh why?
Turn out the lights and dance with me
Until the bitter end

I think the world spins 'round you
You make me feel so weightless, oh
Teach me to fly so high like you
'Cause love is all around
Love is all around 'cause you're a superstar

I think the world spins 'round you
You make me feel so weightless, oh
Teach me to fly so high like you
'Cause love is all around
Love is all around 'cause you're a superstar
