

Goon Moon, Balloon

Balloon

Can we get up
And take a ride?
I really need to get some things off my mind
I wanna live on top of the sun
Don't want to see the dark with you or anyone

Stick me up
In the sky
It don't make a difference if we live or die
Tell me jokes I'll pretend to laugh
I really should, it will be a big gas

I gotta get out, I gotta get out of here
I gotta get out, I gotta get out of here
I gotta get out, I gotta get out of here
Soon

Does anybody got a balloon?
I gotta get out of this room, now
Does anybody got a balloon?
I want to float away with you

Well now you're stuck with the slack
You better watch it
Cause now it's comin back
After all, it doesn't matter anymore
I need it away
Yeah it's half past four. (?)

Does anybody got a balloon?
I gotta get out of this room, now
Does anybody got a balloon?
I want to float away with you

Can we get up
And take a ride?
I really need to get some things off my mind
I wanna live on top of the sun
Don't want to see the dark with you or anyone

Stick me up
In the sky
It don't make a difference if we live or die
Tell me jokes I'll pretend to laugh
I really should, it will be a big gas

I gotta get out, I gotta get out of here
I gotta get out, I gotta get out of here
I gotta get out, I gotta get out of here
Soon

Does anybody got a balloon?
I gotta get out of this room, now
Does anybody got a balloon?
I want to float away with you
