

# Gorefest, The Putrid Stench Of Human Remains

Rotting from the inside out  
The pain is intense, you're screaming loud  
Bowels are burning, acid burns in your veins  
You won't survive but die in pain  
Eyes are hurting, turning black  
You're decomposing, a human wreck  
In agony you're crying out  
As you coughed, a lung came out

Pus is flowing from the gastric  
The putrid stench of human remains

Your intestines fall out, a bloody mess  
Maggots feasting, eating your lost flesh  
They crawl into you, via anal ways  
Perforating your stomach within a day

Your remained guts have been gone  
No more organs left to live on  
Your brain is intact, still catching sounds  
But there is only pus remaining on the ground

Pus is flowing from the gastric  
The putrid stench of human remains
