

# Gorillaz, The Sounder

You couldn't escape this music even if your name's Houdini  
Our tracks say Life, Phi Life and don't disappear like a genie  
Communicating through your airwaves like a giant C.B.  
Cos this one's for your radios or whether you receive me  
Our music is so hot it feels like the sun in Tahiti  
We wickedy-wock Gorillaz style is buck wild believe me  
We're heavy weights who phase ya, like Ali did with Frasier  
We spit the most flavour, and musically we'll amaze you  
We've been blessed and we've been gifted, by Jesus in his manger  
Won't you shout halleluiah, here comes the music saviour  
From your heart to your mind, your spirits to your souls  
We've come to take control, with the Gorillaz on patrol  
See our rhymes possess the powers of a super hero  
Supernaturally we rock the mic but with a natural flow  
If you didn't know before, you know now we told you so  
Gorillaz rock it on just like the one in Tokyo

Chorus...

Cos we're making this music that's making you lose it  
So people don't abuse it, and there ain't no way for you to refuse it  
Gorillaz be the army that's starting this party hard  
Making more noise than carnivals mixed with the Mardi-Gradi  
We're coming through your town with this sound that's so profound  
Gorillaz with the rappers that straight from the underground  
We're tearing it down, making you feel this sort of force  
Knocking it into your senses and knocking you off your course  
Cos we're the source, got your feeling that's so appealing  
We got you jumping around and bouncing off of the ceiling  
Making music and feeling from Baltimore into Bristol  
I know you're hearing me cos my voice is clearer than crystal  
The casual supernatural flows I be exposing  
Making sure that you're frozen and making sure that I'm chosen  
To rip us four make you damage the dance floor  
Gorillaz and Phi life will give you what you ask for

Chorus...

Let Gorillaz be your guiding light and your shining star  
Whether you be home alone, or driving in your car  
Don't matter who you are, whether you be near or far  
You'll be feeling entertained by our music repertoire  
See our poems they be flowing like rivers or reservoirs  
Cos Gorillaz we be out of this world like men of Mars  
We're rap stars with supernatural spars  
We leave your brain amazed with this super music of ours  
So put your hands up and stand up it's time to get down  
It's Gorillaz and Phi Life we be breaking you round  
From the right to the left, From the skies to the ground  
We're covering all angles and you cant escape the sound  
On the track that's laid back, we've come to spray raps  
Keep it chilled and relaxed but we still sound phat

It's like that  
When we write raps  
We're not from the empire but we still strike back

So put your hands up and stand up it's time to get down  
It's Gorillaz and Phi Life, we be breaking you round  
Put your hands up and stand up it's time to get down  
It's Gorillaz and Phi Life, we be breaking you round
