Gotthard, You

Something's wrong, doctor please Got a strange heart disease And I desperately need to get over This temptation

There she stands day by day And my life turns away It was love at the first sight And I know this won't come easy

Couldn't move, I was petrified Couldn't talk, when she passed me by Now she's constantly part In my thoughts, in my heart Can't hold another day

All I want is you, you, you Nobody else but you, you, you Come rain and shine It's all the same Everytime I call your name

Certain things meant to last Some others, part of the past I know that I can't be wrong Lovin' you

So gimme a chance, a little sign.... And I know That one day you're mine I want you to know no way I let go Surrender to my love

All I want is you, you, you Nobody else but you, you, you Come rain and shine It's all insane Everytime you play that game

All I want is you, you, you Nobody else but you, you, you Come rain and shine Its all the same

All I want is you, you, you Nobody else but you, you, you Come rain and shine It's all insane Everytime you play that game
