

# Gov't Mule, Which Way Do We Run?

Time fades slowly across the plains  
Dreams so real - you can reach right out and touch them  
Me - why'd you have to go and pick me  
Do you know - do you even know can you tell me

Which way do we run  
Which way do we run  
Which way do we run

Think - Instincts tell you nothing now  
The shadow of a giant can be felled by the shadow of a man  
Demons stealing down from the heavens  
Here comes one now - with a lightning bolt in his teeth

Which way do we run  
Which way do we run  
Which way do we run

I ain't gonna dream forever  
But I'm gonna try and live  
Tell me can you taste forever - right now Right now

Little Elvis Hitler don't'cha follow me  
These scars on my back - they're because of you  
And these cuts on my wrists  
They're just me trying to get away from you  
And I'm still trying to get away

Which way do we run  
Which way do we run  
Which way do we run  
Which way do we run  
Which way do we run  
Which way do we run
