

Gowan, Call It A Mission

(Lawrence Gowan)

Like the mouse that's in the maze
That runs around for days and days
Well that's the way I see your life is heading
But if I read your signals right
You're dying to explode tonight
And if that be the case I think I'm ready (I'm ready, ready)
You've got too much in you to let it lie
Or contemplate a messy suicide...
If we've got to ride this road into paradise
I think we might make something together
Maybe we'll shake a dream to reality
Help me to make it one to remember
Forever - call it a mission
This dirty little world you're on
Is only yours until you're gone
And who knows why this burden's laid upon you
The sky is high, the seas are wide
And no one's seen the other side
But either way to say it is plain - I want you (I want you, want you)
I know it's bad - I can see you're bleeding
But maybe we just found the thing you're needing
If we've got to ride this road into paradise
I think we might make something together
Maybe we'll shake a dream to reality
Help me to make it one to remember
Forever - call it a mission
Forever - call it a mission
There ain't a man alive more right for you
I tell you girl there's just one thing left to do
We got to ride...
We've got to ride this road into paradise
I think we might make something together
Maybe we'll shake a dream to reality
Help me to make it one to remember
Forever - call it a mission
Forever - call it a mission
Forever - call it a mission
Forever - call it a mission
