

Gowan, Guns And God

Take a look at the million crosses
Planted in the field
Take a look at the streets around you
And tell me what's the deal
For so many there's a battle raging on
And they'll never rest in peace until it's won

Guns and God are forever
Guns and God
Just remember
You're never gonna know the world without 'em
Guns and God, oh yeah

Raise you fist and salute your forces
And crush your enemy
Make 'em pay for the pain you've suffered
For all the hurt you've seen
They deserve to be escorted straight to hell
So feel justified and know that you've done well

Guns and God are forever
Guns and God
Just remember
You're never gonna know the world without 'em
Guns and God, oh yeah

The bell tolls for the fallen hero
Lying on the ground
Night falls and the skys all light up
Better pray you'll not go down
Is it to late to turn this thing around?

Guns and God are forever
Guns and God
Just remember
You're never gonna know the world without 'em
Guns and God, oh yeah
