

Graham Colton Band, Find Me

There's no more incense burning in the room
There's no more suspense before we touch
And all the time spent to make you happy
And all I find then is what I wanted was
You and only you
I try to say good bye
Find then something give me one more try
Cause you and only you
I try to say goodbye
Find then something give me one more try
And all the time with my naked self
I put my clothes on and feel like someone else
But with all the love spent it creates a sin
She is water that sticks in my skin
You and only you
I try to say goodbye
Find then something give me one more try
Cause you and only you
I try to say goodbye
Find then something give me one more try
It was you and only you
I try to say goodbye
Find then something give me one more try
Cause you and only you
I try to say goodbye
Find then something give me one more try
Theres no more incense burning in the room
theres no more suspense before we touch
And all the time spent to make you happy
And all I find then was what I wanted was
You and only you
I try to say goodbye
Find then something give me one more try
Cause you and only you
I try to say goodbye
Find then something give me one more try
