

# Grant Hart, Think It Over Now

Never wish away a moment  
No  
Don't you cover yourself with clover  
You should know that where the clover grows  
That it's you that it's growing over  
Don't take it all upon yourself  
Don't you carry it on your shoulder  
Set it down right back where you found it  
You know it's a heavy boulder  
Think it over now  
We should really think it over sometime  
Think it over now  
We should really think it over sometime  
Putting someone up above you  
Yeah  
Then you go looking up from under  
Pick and choose it's a lot to lose  
When you give up what you wonder  
All the loneliness you hold inside  
All the pain that you don't exhibit  
Exhale  
Walk away from jail  
You can always go back and visit  
Think it over now  
We should really think it over sometime  
Think it over now  
We should really consider it sometime  
Think it over now  
We should really think it over sometime  
Think it over now  
We should really consider it sometime  
Do what you're going to do for  
You  
Don't you look to see who's approving  
Time will show that  
There's the ones that go  
And there's those who are never moving  
Think it over now  
We should really think it over sometime  
Think it over now  
We should really consider it sometime  
Think it over now  
We should really think it over sometime  
Think it over now  
We should really consider it sometime
