

# Grave Digger, Demon's Day

You sit alone in lightless chambers, all the love you had is gone

No one there to catch your fall, you never felt so alone  
Blackened thoughts in lonely ruins, lifeless eyes and empty gaze

Death is but a promise now, life is just an empty phrase  
Demons wait in every corner, reach for you with poisoned claws

Madness spreads its wings above, you're lying helpless on the floor

No one there - lost alone - madness rules - love is gone

No escape - never try - no way out - you will die

Come out to the other side

Agony's your friend

Come out I will lead the way

In life there is no sense

[Chorus:]

You're my victim, you're my prey, I will get you on demon's day

Can't you see me, can't you feel me, I will get you on demon's day

No one there - lost alone - madness - rules - love is gone

The sun will never shine

No escape - never try - no way out - you will die

You die so alone

You've gone through hell, you met the devil, demons paved the way you walked

All alone you took the challenge, no one listened as you talked

Now you live a happy life, with all friends up in your head

Pills provide an easy shelter, all your sadness now is dead

[Chorus]
