

Gravity Kills, Down

I'm your fear, I'm your monster
What's hiding in your shadow?
Is it taking what's left of you

Now take me, now lead me from you
Now take me from the light that's dying in your eye

I'm finding out what's left of you
You're burning out (What's left of you?)
Choking on doubt, you're choking
Way down way down now (What's left of you?)

See no fear, speak no evil
Are you screaming out to no one
As you fall down a mountain of pride

I feel you, my eyes wide open
I feel you, do you think you can save yourself in time

I'm finding out what's left of you
You're burning out (What's left of you?)
Choking on doubt, you're choking
Way down way down now (What's left of you?)

What you see, what tears into you
Behind the wheel that leads you
Are you facing a truth that won't die?

Now take me, now lead me from you
Now take me from the light that's dying in your eye

I'm finding out what's left of you
I'm finding out what's left of you
You're burning out (What's left of you?)
You're king of doubt, you're choking
Way down, way down now, what's left of you

What's left of you, you're burning out
What's left of you, choking on doubt
You're choking
Way down, way down now, what's left of you
