

Gravity Kills, Never

I like to live alone
But it's crowded inside sometimes
Look right into a lover's eye

I thought I could fly
But that has been done before
I'm feeling empty
Empty inside.

A life I never knew
A room without a view
My life begins in you
My life it ends in you

It's like I never never never never
Never been here before

Like to be left alone
Forever in time
Loved right lived wrong in another life

I thought I could fly
But that has been done before
I'm feeling hopeless, hopeless inside

A life I never knew
A room without a view
My life it ends in you
My life begins in you

It's like I never never never never
Never been here before

It's like a different disease
Burning inside of me
It's like a different disease

Don't deny what's out of your sight
I get drawn into the light

A life I never knew
A room without a view
My life it ends in you
My life begins in you

It's like I never never never never
Never been here before
