

# Gravity Kills, Never

I like to live alone  
But it's crowded inside sometimes  
Look right into a lover's eye

I thought I could fly  
But that has been done before  
I'm feeling empty  
Empty inside.

A life I never knew  
A room without a view  
My life begins in you  
My life it ends in you

It's like I never never never never  
Never been here before

Like to be left alone  
Forever in time  
Loved right lived wrong in another life

I thought I could fly  
But that has been done before  
I'm feeling hopeless, hopeless inside

A life I never knew  
A room without a view  
My life it ends in you  
My life begins in you

It's like I never never never never  
Never been here before

It's like a different disease  
Burning inside of me  
It's like a different disease

Don't deny what's out of your sight  
I get drawn into the light

A life I never knew  
A room without a view  
My life it ends in you  
My life begins in you

It's like I never never never never  
Never been here before
