

Gravity Kills, Take It All Away

Give in
Open your eye's up to
What you think I'm feeling

Look through
You're pulling me down in
Where you've seen so many

Drowning
Into your water blue
I feel my heart stop beating

Burning
My cross I made for you
My cancer won't stop eating

You wanted too much from all of me
I wanted too much from all of you
I wanted too much from everything I need

Won't you take it all away
I said, won't you take it all away

I don't think you'll make it
Before the door is closing
Don't think that you believe in
Everything you see

I don't think you'll make it
You hear my world exploding
I wanted all too much
From everything

Won't you take it all away
I said, won't you take it all away

Give in
Open your eye's up to
What you think I'm feeling

Floating
Right above you
I fall down below you

I need way too much
From everything

Take it all away
Take it all away

Won't you take it all away
I said, won't you take it all away
